Small skier triggered and natural wind slabs in N. Bridgers

Frazier Basin
Bridger Range
4/13/2019
Code
SS-ASu-R1-D1
Notes

A group of skiers reported triggering a small wind slab avalanche in the Northern Bridger Range. No one was caught. A separate group also wrote: "On east facing test slopes near 8,000 feet we found very reactive wind slabs, about 8-12 inches deep." And they saw recent natural activity.
