

Skier triggered loose snow and natural wind slabs at Bridger

Bridger Peak
Bridger Range
11/30/2019
Code
L-R1-D1.5
Elevation
8300
Aspect
E
Latitude
45.77010
Longitude
-110.94000
Notes

Skiers saw natural soft slabs that broke below the [cornice](#) along the ridge near Slushman's lift.

Another group reported: "I spotted a buddy skiing the lower nose and he started a couple of slow moving sluffs, well in his wake... We did see a recent point release in that zone, from a ski [track](#) , that ran over 200 feet in steep terrain."
