## Widespread cracking at Lionhead

Targhee Pass Meadows Lionhead Range 12/8/2019 Code

SS-ASc

Elevation

8200

Aspect

NE

Latitude

44.68590

Longitude

-111.29000

Notes

Skiers at Targhee Pass near West Yellowstone reported: "We got a few good collapses while skinning up through east-facing low angle meadows, and got some serious cracking and collapsing while stomping on fresh wind pillows just below ridgeline on a northeast-facing slope at about 8200'. We dug down at one of the cracks and found a 35cm thick F+ slab that had failed on a layer of 4-6mm depth hoar. Cracks propagated close to 100'..."
