## Skier Triggered Avalanche Mount Blackmore - East Face

Mt Blackmore
Northern Gallatin
12/28/2020
Code
SS-ASu-R1-D1-O
Elevation
9500
Aspect
E
Latitude
45.44460
Longitude

-111.00000 Notes

From obs: "Skier Triggered a 1.5'  $\underline{\text{slide}}$  to his right while making a turn near a cliff band. The  $\underline{\text{slide}}$  did not intersect with the skier's path. We did a ECT before choosing our line and were not able to get the soft  $\underline{\text{slab}}$ , or anything else to propagate, but clearly, the  $\underline{\text{slab}}$  is ready to go as it slid on rocks. We both skied out without incident."

Number of slides

1

Number caught

0

Number buried

0

Avalanche Type

Soft slab avalanche

Trigger

Skier

Trigger Modifier

u-An unintentional release

R size

1

D size

1

**Bed Surface** 

O - Old snow

Problem Type

Persistent Weak Layer
