

Large Natural on Saddle Peak, between the peaks

Saddle Peak

Bridger Range

12/28/2021

Code

N-R2-D2

Elevation

9000

Aspect

E

Latitude

45.79430

Longitude

-110.93600

Notes

From skier obs on 12/31/21: 2 or 3 days ago [Saddle] went to the ground, big, between the peaks, full [track](#) . Yesterday quarter Saddle went big as well. Stepped down lower in the [track](#) .

the whole basin between the peaks [except a pocket that slid 3 days earlier] pulled out just under the c [cornice](#) and went to ground until it went into the narrows and then rode up on a layer until about halfway down and then stepped down another 2-3' and ran at least 2/3 of that run to the traverses back to schlasman's.
