 Stability Test Notes:

Layer note  
**130-131: s**  
**98-99: Pro**

Notes: Just dug the top third of the snowpack. Upper SH layer was not reactive at all and not sure if it will be either. Lower layer of SH was a surprise. 30/100 (end). Small soft slab of new snow avalanched the new snow on the steep rollover (est. 30 feet wide).
