 Sun Dec 4 10:45 2016 (MST)  
 Co-ord: 45.80182N, -110.92921W  
 Slope Angle: 31°  
 Wind Loading: previous

Stability: Fair  
 Air Temperature:  
 Sky Cover: 4/8 to 8/8 covered  
 Precipitation: None  
 Wind: SW Light Breeze

HS75  
 Stability Test Notes  
 0: Failed, ECTP 36

Layer No  
 0-15: Prob

Elevation: 8000 ft  
 Aspect: 100°  
 Specifics: Pit dug in a Ski Area; Recent activity on similar slopes; Recent activity on different slopes; Ski tracks on slope

Hard to initiate propagation. We decided to avoid steeper, more complex terrain due to unstable results and recent avalanche activity. Good skiing.
